

The Hikari Method Guide

Master Your Life & Money in 3 Steps

This guide will walk you through the core process to move from chaos to control by linking your tasks and finances.

Step 01: CLARITY – Visualize the Chaos

The goal of this phase is to get everything out of your head and into one trusted place.

Action: Perform a full "Brain Dump." Add every task, project, thought, and expense—no matter how small—into Hikari's Unified Inbox.

Why it works: This stops mental load and gives you a complete, honest map of your commitments and spending. Use Endless Scroll Prevention to keep this initial input session focused and finite.

Outcome: A single, secure vault showing your entire life's landscape.

Step 02: FOCUS – Split to Conquer

Now, turn overwhelming projects into manageable actions.

Action: Take a complex project (like "Write Thesis" or "Launch Website") and use the AI Smart Splitter. It will automatically break it down into 15-minute bite-sized blocks.

Why it works: Huge tasks cause procrastination. Small, clear steps make starting easy. Enter Focus Mode with the Pomodoro Timer to work through one block at a time without distraction.

Outcome: A clear, step-by-step path forward where progress is visible and momentum is built.

Step 03: FREEDOM – Watch it Grow

Finally, connect your daily work to your financial reality.

Action: As you complete tasks, log related expenses or income. Use Task-Expense Linking to connect a cost (e.g., "\$450 for website hosting") directly to its project. Watch your Net Worth Graph update in real-time.

Why it works: This shows the direct "correlation between your focus and your finances." You see the true cost of projects and the ROI of your time, making your effort tangible.

Outcome: Financial clarity and the motivation that comes from literally watching your progress and net worth grow together.

By following these three steps consistently, you transform scattered tasks and hidden expenses into a unified system for achieving your goals.
